Art. Leather offers great versatility and ability to imitate the look of real leather. Its durable surface impervious to moisture, making it ideal for healthcare and marine environments and high traffic commercial seating. The fabric's knit back makes it easy to tailor and form rounded corners. The Topcoats for Art. Leather provide gloss and surface feel, they also impart critical performance properties.

Art. Leather Care :

Its popularity is due in large part to its durability and resistance to dirt, soil, and water. If maintained properly, a product that is made from Art. Leather will be resilient and will last for many years.

- Immediately blot up liquid spills with a dry or lightly dampened (never wet) clean white cloth, sponge or paper towel. Gently scrape off any solid residue prior to cleaning.
- Dust or vacuum frequently. Tiny dust particles can clog pores resulting in premature wear.
- Keep your Art. Leather furniture at least two feet from radiators or other heat sources.
- Avoid placing furniture in direct sunlight to help prevent fading.
- If a spill occurs, simply wipe up.
