# Recliners INDIA®

Since 1996

Gulmarg is a rich, warm & tightly woven fabric. It closely resembles linen weaving but is heavier and softer to touch. Subject to strict quality controls throughout the manufacturing process, Gulmarg is exceptional when it comes to finish, durability, looks and simple care.

Add a touch of class, style and gracious warmth to your interiors with Gulmarg fabrics.

## Gulmarg Care:

- Dirt and dust that remains in the fabric breaks down the fabric fibres and contributes greatly to shorten the life of the fabric. Regular vacuuming with a soft brush prevents degradation and is essential for the textile to achieve longevity.
- Immediately blot up liquid spills with a dry or lightly dampened (never wet) clean white cloth, sponge or paper towel. Gently scrape off any solid residue prior to cleaning.
- Keep your Gulmarg fabric upholstered furniture at least two feet from radiators, fireplaces or other heat sources. Prolonged exposure to direct heat sources can damage the fibers in the fabric upholstery.
- Avoid placing furniture in direct sunlight to help prevent fading.
