## Leather Care :

- These leathers receive a protective treatment during the tanning process, which allows for easy clean-up of everyday soiling and spills.
- On a regular basis vacuum your leather sofa with a soft brush.
- Common Spots and Spills, Blot excess liquid immediately with a clean absorbent cloth or sponge. If necessary, use Mild Cleanser and gently wipe spill. Allow it to air dry naturally.
- Avoid direct exposure to sunlight and installation of the product in the proximity of heat sources.
- Do Not Use any saddle soaps, oils, abrasives, furniture polish, varnish or ammonia water. These may harm the finish and permanently damage the leather.
